Aims and Scope

The *Journal of Rural Studies* publishes research articles relating to such rural issues as society, demography, housing, employment, transport, services, land-use, recreation, agriculture and conservation. The focus is on those areas encompassing extensive land-use, with small-scale and diffuse settlement patterns and communities linked into the surrounding landscape and milieux. Particular emphasis will be given to aspects of planning policy and management. The Journal is international and interdisciplinary in scope and content.
